★★★★★ Low Water Use	★★★★★ Low Maintenance
★★★★★ Heat Tolerance	★★★★★ Cold Tolerance
★★★★★ Drought Tolerance	★★★★★ Disease Resistance
★★★★★ Shade Tolerance	★★★★★ Leaf Texture

- **Marco Polo** sheep fescue (*Festuca ovina*) is ideally suited for low maintenance areas, including roadsides, berms, and reclamation sites.
- With a low growth habit, unique blue-green color and beautiful seedhead...

Ideal for difficult to manage slopes and rocky areas where turfgrass is well suited for ground cover and aesthetic quality.

Exceptionally well adapted to the northern portions of the dry, arid West, including upper elevations to sub-alpine zones.

PERFORMANCE HIGHLIGHTS

WATER USE: Marco Polo is a low water use grass. It is well suited for arid and semi-arid regions. Marco Polo is excellent for golf course outer roughs.

HEAT TOLERANCE: Marco Polo is a heat tolerant grass. It is well suited for hot, dry climates. It is a low maintenance grass.

LOW MAINTENANCE: Marco Polo is a low maintenance grass. It is well suited for areas where low maintenance is desired. It is a low water use grass.

LOW MAINTENANCE: Once established, Marco Polo is extremely well-suited to dry, summer conditions. With its only dormancy limit to seasonal droughty conditions, this variety is a proven performer under difficult conditions.

LOW MAINTENANCE: With low mowing, Marco Polo exhibits a beautiful spring display from early to late summer. This unmowed appearance provides a beautiful contrast to greened turf areas, especially in golf course rough situations.

LOW MAINTENANCE: Marco Polo is a low maintenance grass. It is well suited for areas where low maintenance is desired. It is a low water use grass.

LOW MAINTENANCE: Marco Polo is a low maintenance grass. It is well suited for areas where low maintenance is desired. It is a low water use grass.
