- Reduced nitrogen requirements

Seeding Rates

- New turf: 2-3 pounds per 1,000 square feet or 75-125 pounds per acre
- Seeds per pound: Approximately 1,200,000

Germination

- 14-21 days

Getting turf to look good is the easy part. Getting that same turf to stand up to constant traffic, use and abuse is something else.

Arcadia Kentucky Bluegrass is a perfect fit for everything from sports fields to golf course fairways, as well as sod production and landscaped lawns.

With color ratings equal to the Midnight types and distinctive performance characteristics of its own, Arcadia Kentucky Bluegrass gives you beautiful turf that's built for top-notch performance today, tomorrow and well beyond.

Top-ranked in two NTEP trials, Arcadia boasts superior quality under all mowing heights from half-inch fairways to three-inch home lawns. It has exceptional sod strength and high traffic tolerance. And it's better longer, greening earlier with year-round high density and low weed invasion. Arcadia also has high Dollar Spot resistance and is built to take the heat, when sun and drought are turning other turfs brown with envy.
