

WE TAKE TURF AS SERIOUSLY AS YOU DO

Mountainview has been building a reputation for over 30 years as a supplier of quality home-grown sod and friendly knowledgeable service. We're a mainstay in the Ottawa Valley Golf industry with our turf gracing many of the most prestigious courses in the area.

We approach working with golf course superintendents as a partnership—knowing fully well that our distinct areas of expertise will complement one another. Together, we'll find new ways to keep your fairways flawless and greens up to par.

Varieties:

- **Elite Fairway Kentucky Bluegrass** – Blended for genetic colour and texture, this turf will make an attractive addition to your facilities. It is naturally disease and wear resistant, quickly repairs itself, tolerates a low height of cut and exclusively consists of premium dwarf varieties. Expect a uniform and dark, highly dense surface ideal for golf turf applications.
- **Next Generation Tee Sod** – This new blend from the Limousine family of Kentucky Bluegrasses includes the best of all varieties. Enjoy a broader growth base, deep colour and upright growth habit in one grass, which thrives on a 1/2 inch cut. Expect scuffs, not divots, in a superior surface which heals quickly and is aggressive but not thatchy.
- **Greens Quality Bentgrass** – Best used for putting greens, tees & fairways, this product has minimum thatch and is Poa free. Grown under the supervision of a professional greenskeeper to ensure exacting golf course standards, our bentgrass is maintained at a low cut height for ease of transition from nursery to green. Upon request, we can also "contract grow" for new course construction or renovation specifications
- **Fescue** – Our Fescue blend is also called Ruhs grass after the golf course superintendent who co-created it. This product is exceptional in rough applications and sand traps. It was developed to be winter hardy, shade and drought tolerant, saline resistant and ideal in a low-fertility environment.

Quality Monitoring:

Before you even see your sod, we will have formulated a detailed outline of the exact characteristics of your turf. Enjoy peace of mind knowing:

- The density of your turf.
- The precise shade and colour of your turf.
- The quality and condition of your turf.
- That the mowing height and upright growth habit of your turf is ready-grown for immediate use upon installation.
- That even after installation, we'll be available to attend to your needs if there's a problem.

The Mountainview Advantage:

- We make it a priority to understand the unique requirements of golf course superintendents—so much so that we've employed a couple ourselves.
- Everything is handled in-house. As a result, you can count on better pricing, a broad range of expertise and absolute accountability by purchasing everything from one supplier.
- With our own fleet of trucks and equipment, we can respond to your needs quickly and let you know exactly when your delivery will be arriving.
- Quality of product and service are assured.
- We service a vast territory from Belleville to Montreal through the 401 Corridor.
- We're fully bilingual and looking forward to serving you in the language of your choice.
